**NEW QUESTION: 1**The members of your project team have been assigned to your project with general availability levels of 50%.Yesterday, they reported to you that significant variances occurred during project execution. You observed that the team members are spending less than 50% of their time working for your project. Your project schedule is on the way to become heavily delayed and deadlines are in jeopardy. What should you do?**A.** Talk with the line managers. Negotiate clear and written assignments with predictable levels of effort.**B.** Focus on internal charges. Make sure that your project is not getting charged for more than the actual work.**C.** Ignore the difficulties, adjust your schedule and negotiate new deadlines according to the slower progress.**D.** Talk to your sponsor and try to get more resources assigned on similar conditions as the existing ones.**Answer: A**

**NEW QUESTION: 2**The Liberty buildpack is used when deploying which kind of applications?**A.** Java EE**B.** Swift**C.** ASP.Net**D.** Node.js**Answer: A****Explanation:**ExplanationExplanation Stand-alone applications such as WAR or EAR files can be deployed to Liberty in Bluemix.These features correspond to the Java EE 7 Web Profile features.Note: The Liberty buildpack is used when the following kinds of applications are deployed:WAR filesEAR filesLiberty server directoryLiberty packaged serverJava mainDistzipReferences: [https://console.bluemix.net/docs/runtimes/liberty/optionsForPushing.html#stand\\_alone\\_apps](https://console.bluemix.net/docs/runtimes/liberty/optionsForPushing.html#stand_alone_apps)

**NEW QUESTION: 3**You develop a set of Power Shell scripts that will run when you deploy new virtual machines (VMs).You need to ensure that the scripts are executed on new VMs.You want to achieve this goal by using the least amount of administrative effort.What should you do?**A.** Create a new virtual hard disk (VHD) that contains the scripts.**B.** Load the scripts to a common file share accessible by the VMs.**C.** Set the VMs to execute a custom script extension.**D.** Create a new GPO to execute the scripts as a logon script.**E.** Create a SetupComplete.cmd batch file to call the scripts after the VM starts.**Answer: C****Explanation:**After you deploy a Virtual Machine you

typically need to make some changes before it's ready to use. This is something you can do manually or you could use Remote PowerShell to automate the configuration of your VM after deployment for example. But now there's a third alternative available allowing you customize your VM: the CustomScript extension. This CustomScript extension is executed by the VM Agent and it's very straightforward: you specify which files it needs to download from your storage account and which file it needs to execute. You can even specify arguments that need to be passed to the script. The only requirement is that you execute a .ps1 file.
