**NEW QUESTION: 3** Refer to the exhibit. Which two statements about the output are true? (Choose two.)  
**A.** Configuration changes have been installed to FortiGate and represents FortiGate configuration has been changed  
**B.** The latest history for the managed FortiGate does not match with the device-level database  
**C.** The latest revision history for the managed FortiGate does match with the FortiGate running configuration  
**D.** Configuration changes directly made on the FortiGate have been automatically updated to device-level database  
**Answer: B,C**  
Explanation: STATUS: dev-db: modified; conf: in sync; cond: pending; dm:

retrieved; conn: up- dev-db: modified - This is the device setting status which indicates that configuration changes were made on FortiManager.- conf: in sync - This is the sync status which shows that the latest revision history is in sync with Fortigate's configuration.- cond: pending - This is the configuration status which says that configuration changes need to be installed. Most probably a retrieve was done in the past (dm: retrieved) updating the revision history DB (conf: in sync) and FortiManager device level DB, now there is a new modification on FortiManager device level DB (dev-db: modified) which wasn't installed to FortiGate (cond: pending), hence; revision history DB is not aware of that modification and doesn't match device DB. Conclusion:- Revision DB does match FortiGate.- No changes were installed to FortiGate yet.- Device DB doesn't match Revision DB.- No changes were done on FortiGate (auto-update) but configuration was retrieved instead After an Auto-Update or Retrieve:device database = latest revision = FGT Then after a manual change on FMG end (but no install yet):latest revision = FGT (still) but now device database has been modified (is different). After reverting to a previous revision in revision history:device database = reverted revision != FGT
