NEW QUESTION: 1Note: This question is part of a series of questions that present the same scenario. Each question in this series contains a unique solution. Determine whether the solution meets the stated goals. Your company has employees in different regions around the world. You need to create a database table that stores the following employee attendance information: - Employee ID- date and time employee checked in to work- date and time employee checked out of work Date and time information must be time zone aware and must not store fractional seconds. Solution: You run the following Transact-SQL statement: Does the solution meet the goal? **A. Yes B. No** **Answer: B** Explanation: Explanation datetime2 defines a date that is combined with a time of day that is based on 24-hour clock. datetime2 can be considered as an extension of the existing datetime type that has a larger date range, a larger default fractional precision, and optional user-specified precision.
