Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have an Azure subscription that contains 10 virtual networks. The virtual networks are hosted in separate

resource groups. Another administrator plans to create several network security groups (NSGs) in the subscription. You need to ensure that when an NSG is created, it automatically blocks TCP port 8080 between the virtual networks. Solution: You assign a built-in policy definition to the subscription. Does this meet the goal? **A. Yes** **B. No** **Answer: B** **Explanation:** Explanation Resource policy definition used by Azure Policy enables you to establish conventions for resources in your organization by describing when the policy is enforced and what effect to take. However, there are no built-in policy definitions. Though there are sample policy definitions. Reference: <https://docs.microsoft.com/en-us/azure/azure-policy/policy-definition>
