NEW QUESTION: 1 Which feature enables you to display details about a data point in a chart? Please choose the correct answer. Response: **A. Smart Predict B. Search to Insight C. Smart Insights D. Smart Discovery** **Answer: C**

NEW QUESTION: 2 How does Cisco Trustsec enable more access controls for dynamic networking environments and data centers? **A. assigns a VLAN to the endpoint B. uses flexible NetFlow C. classifies traffic based on advanced application recognition D. classifies traffic based on the contextual identity of the endpoint rather than its IP address** **correct Answer: D**
Explanation: Explanation The Cisco TrustSec solution simplifies the provisioning and management of network access control through the use of software-defined segmentation to classify network traffic and enforce policies for more flexible access controls. Traffic classification is based on endpoint identity, not IP address, enabling policy change without network redesign.

NEW QUESTION: 3 An intruder was recently discovered inside the data center, a highly sensitive area. To gain access, the intruder circumvented numerous layers of physical and electronic security measures. Company leadership has asked for a thorough review of physical security controls to prevent this from happening again. Which of the following departments are the MOST heavily invested in rectifying the problem? (Select THREE). **A. Human resources B. Facilities management C. Information technology D. Marketing E. Data center operations F. Research and development G. Programming** **Answer: B, C, E**
Explanation: **A:** Facilities management is responsible for the physical security measures in a facility or building. **E:** The breach occurred in the data center, therefore the Data center operations would be greatly concerned. **G:** Data centers are important aspects of information technology (IT) in large corporations. Therefore the IT department would be greatly concerned. **Incorrect Answers:** **B:** Human Resources security is concerned with employees joining an organization, moving between different positions in the organization, and leaving the organization. **C:** Research and Development is concerned with security at the design and development stage of a system. **D:** Programming security is concerned with application code and application vulnerabilities. **F:** Marketing is not concerned with security. **References:** Gregg, Michael, and Billy Haines, CASP CompTIA Advanced Security Practitioner Study Guide, John Wiley & Sons, Indianapolis, 2012, pp. 281, 326-328
