NEW QUESTION: 1Integration and connectivity concerns of the proposed Document Management System (DMS) are BEST to review with the:**A.** IT department.**B.** help desk.**C.** Chief Executive Officer (CEO).**D.** Chief Information Officer (CIO).**Answer: A**

NEW QUESTION: 2You troubleshoot the switch that a WLC is connected to and find that some VLANs were missing and the wireless clients did not receive IP details. Which VTP mode must be configured on the switch for the switch to receive the VLAN details automatically from the central switch?**A.** transparent mode**B.** client mode**C.** server mode**D.** off**Answer: B**

NEW QUESTION: 3You have a server named File1 that runs Windows Server 2012 R2. File1 has the File Server role service installed. You plan to back up all shared folders by using Microsoft Online Backup.You download and install the Microsoft Online Backup Service Agent on File1. You need to ensure that you use Windows Server Backup to back up data to Microsoft Online Backup.What should you do?**A.** From the Services console, modify the Log On settings of the Microsoft Online Backup Service Agent.**B.** From Computer Management, add the File1 computer account to the Backup Operators group.**C.** From a command prompt, run wadmin.exe enable backup.**D.** From Windows Server Backup, run the Register Server Wizard.**Answer: D**
Explanation:Explanation/Reference:Explanation:Download and install the Windows Azure Online Backup Agent After you create an account on the Windows Azure Online Backup website, you can download the Windows Azure Online Backup Agent and install it locally.An Online Backup node then appears in the navigation pane of the Windows Server Backup console, as shown in Figure 12-If you prefer, you can also configure online backups from the Windows Azure Online Backup console, which becomes available after you install the agent. The Windows Azure Online Backup console provides exactly the same set of options as the Online Backup node in the Windows Server Backup console.Register serverThe next step is to

register your server. Registering a server enables you to perform backups from that same server only. (Remember this point for the exam.) To register the server, from the Actions menu, select Register Server. The Register Server Wizard includes two configuration steps. First, you are given an opportunity to specify a proxy server if desired. Second, you are asked to provide a passphrase that will be used to encrypt your backup data and a location to save this passphrase in a file. You need to provide this passphrase when you perform a restore operation, so it's essential that you don't lose it. (Microsoft doesn't maintain a copy of your passphrase.) A Generate Passphrase option creates the passphrase for you automatically. After you register a server, new options for Online Backup appear in the Actions pane, including Schedule Backup, Recover Data, Change Properties, and Unregister Server.
