NEW QUESTION: 1The Security team is concerned because the number of AWS Identity and Access Management (IAM) policies in the environment is increasing. The team tasked a SysOps Administrator to report on the number of IAM policies in use and use the total IAM policies. Which AWS service should the Administrator use to check how current IAM policy compares to current limits?**A. AWS Config****B. AWS Trusted Advisor****C. Organizations****D. Amazon Inspector**
Answer: A
Explanation: AWS Config is a service that enables you to assess, audit, and evaluate the configurations of your AWS resources. Config continuously monitors and records your AWS resource configurations and allows you to automate the evaluation of recorded configurations against desired configurations. With Config, you can review changes in configurations and relationships between AWS resources, dive into detailed resource configuration histories, and determine your overall compliance against the configurations specified in your internal guidelines. This enables you to simplify compliance auditing, security analysis, change management, and operational troubleshooting.
