You can learn and simulatedly test the knowledge points in your computer, You might as well download the free demo in our website and making a study of our C_ARSCC_2404 study questions files.

You can totally trust in our C_ARSCC_2404 exam questions, Before the clients purchase our C_ARSCC_2404 study practice guide, they can have a free trial freely, Besides, we check the updating of C_ARSCC_2404 exam questions everyday to make sure the process of preparation smoothly.

Though the content of them are the same, the different layouts provide **Latest C_ARSCC_2404 Dumps Book** lots of conveniences out of your imagination, This version has helped a lot of customers pass their exam successfully in a short time.

No website like us provide you with the best SAP Certified Associate examcollection [C_ARSCC_2404](#) dumps to help you pass the SAP Certified Associate - Implementation Consultant - SAP Business Network for Supply Chain valid test, also can provide you with the most quality services to let you 100% satisfied.

Don't miss the good opportunity [SAP Certified Associate - Implementation Consultant - SAP Business Network for Supply Chain](#) .We can promise you it is absolutely beneficial to you.

NEW QUESTION: 1You have an Azure subscription named Subscription1. Subscription1 contains the virtual networks in the following table.Subscription1 contains the virtual machines in the following table:The firewalls on all the virtual machines are configured to allow all ICMP traffic.You add the peerings in the following table.For each of the following statements, select Yes if the statement is true. Otherwise, select No.NOTE: Each correct selection is worth one point.**Answer:** Explanation:Explanation:Box 1: YesVnet1 and Vnet3 are peers.Box 2: YesVnet2 and Vnet3 are peers.Box 3: NoPeering connections are non-transitive. References: <https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/hybrid-networking/hub-spoke>

NEW QUESTION: 2172.16.0.0 / 16のIPアドレス空間を使用するオンプレミスネットワークがあります。25台の仮想マシンを新しい azureサブスクリプションに展開する予定です。あなたは以下の技術的要件を特定します。* すべてのAzure仮想マシンは同じサブネットsubnet1に配置する必要があります。* すべてのAzure仮想マシンは、すべてのオンプレミスサーバーと通信する必要があります。* サーバーは、サイト間VPNを使用して、オンプレミスネットワークとAzureの間で通信する必要があります。技術的要件を満たすサブネット設計を推奨する必要があります。あなたは推薦に何を含めるべきですか？回答するには、適切なネットワークアドレスを正しいサブネットにドラッグします。各ネットワークアドレスは、1回、複数回、またはまったく使用しないことができます。コンテンツを表示するには、ペイン間の分割バーをドラッグするか、スクロールする必要があります。注：それぞれ正しい選択は1ポイントの価値があります。**Answer:** Explanation:Topic 1, Case Study A Overview:Existing EnvironmentActive Directory Environment:The network contains two Active Directory forests named corp.fabnkam.com and rd.fabrikam.com. There are no trust relationships between the forests. Corp.fabrikam.com is a production forest that contains identities used for internal user and computer authentication.

Rd.fabrikam.com is used by the research and development (R&D) department only. Network Infrastructure: Each office contains at least one domain controller from the corp.fabrikam.com domain. The main office contains all the domain controllers for the rd.fabrikam.com forest. All the offices have a high-speed connection to the Internet. An existing application named WebApp1 is hosted in the data center of the London office. WebApp1 is used by customers to place and track orders. WebApp1 has a web tier that uses Microsoft Internet Information Services (IIS) and a database tier that runs Microsoft SQL Server 2016. The web tier and the database tier are deployed to virtual machines that run on Hyper-V. The IT department currently uses a separate Hyper-V environment to test updates to WebApp1. Fabrikam purchases all Microsoft licenses through a Microsoft Enterprise Agreement that includes Software Assurance. Problem Statement: The use of Web App1 is unpredictable. At peak times, users often report delays. At other times, many resources for WebApp1 are underutilized. Requirements: Planned Changes: Fabrikam plans to move most of its production workloads to Azure during the next few years. As one of its first projects, the company plans to establish a hybrid identity model, facilitating an upcoming Microsoft Office 365 deployment. All R&D operations will remain on-premises. Fabrikam plans to migrate the production and test instances of WebApp1 to Azure. Technical Requirements: Fabrikam identifies the following technical requirements: * Web site content must be easily updated from a single point. * User input must be minimized when provisioning new app instances. * Whenever possible, existing on-premises licenses must be used to reduce cost. * Users must always authenticate by using their corp.fabrikam.com UPN identity. * Any new deployments to Azure must be redundant in case an Azure region fails. * Whenever possible, solutions must be deployed to Azure by using platform as a service (PaaS). * An email distribution group named IT Support must be notified of any issues relating to the directory synchronization services. * Directory synchronization between Azure Active Directory (Azure AD) and corp.fabrikam.com must not be affected by a link failure between Azure and the on-premises network. Database Requirements: Fabrikam identifies the following database requirements: * Database metrics for the production instance of WebApp1 must be available for analysis so that database administrators can optimize the performance settings. * To avoid disrupting customer access, database downtime must be minimized when databases are migrated. * Database backups must be retained for a minimum of seven years to meet compliance requirements. Security Requirements: Fabrikam identifies the following security requirements: * Company information including policies, templates, and data must be inaccessible to anyone outside the company. * Users on the on-premises network must be able to authenticate to corp.fabrikam.com if an Internet link fails. * Administrators must be able to authenticate to the Azure portal by using their corp.fabrikam.com credentials. * All administrative access to the Azure portal must be secured by using multi-factor authentication. * The testing of WebApp1 updates must not be visible to anyone outside the company.

NEW QUESTION: 3 You've set up the standard accrual with encumbrance accounting for your ledger and you realized that the encumbrance journals are defaulting with current date as the accounting date. What is causing this? **A.** The prior related transaction accounting date was set up under the encumbrance accounting Default Date Rule. **B.** The subledger accounting option Is set to system date. **C.** The system date was set up under the encumbrance accounting Default Date Rule. **D.** The current transaction accounting date was set up under the encumbrance accounting Default Date Rule. **E.** The actual accounting date was set up under the encumbrance accounting Default Date Rule. **Answer: D**

NEW QUESTION: 4 Your company recently deployed a new Active Directory forest named contoso.com. The forest contains two Active Directory sites named Site1 and Site2. The first domain controller in the forest runs Windows Server 2012 R2. You need to force the replication of the SYSVOL folder from Site1 to Site2. Which tool should you use? **A.** Dfsrdiag **B.** Repadmin **C.** Active Directory Sites and Services **D.** DFS Management **Answer: A** Explanation: In Windows Server 2012 R2, Windows Server 2008 R2, or Windows Server 2008, you can force replication

immediately by using DFS Management, as described in Edit Replication Schedules. You can also force replication by using the Dfsrdiag SyncNow command. You can force polling by using the Dfsrdiag PollAD command. Reference: DFS Replication: Frequently Asked Questions (FAQ) [http://technet.microsoft.com/en-us/library/cc773238\(v=ws.10\).aspx#BKMK_072](http://technet.microsoft.com/en-us/library/cc773238(v=ws.10).aspx#BKMK_072)
