NEW QUESTION: 1 Refer to the information below to answer the question. An organization has hired an information security officer to lead their security department. The officer has adequate people resources but is lacking the other necessary components to have an effective security program. There are numerous initiatives requiring security involvement. The security program can be considered effective when **A.** risk is lowered to an acceptable level. **B.** backups are regularly performed and validated. **C.** audits are regularly performed and reviewed. **D.** vulnerabilities are proactively identified. **Answer: A**

NEW QUESTION: 2 Note: This question is part of a series of questions that use the same scenario, For your convenience is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is the same in each question in this series. Start of repeated scenario You have six workbook queries that each extracts a table from a Microsoft Azure SQL database. The tables are loaded to the data model, but the data is not loaded to any worksheets. The data model is shown in the Data Model exhibit. Your company has 100 product subcategories and more than 10,000 products. End of repeated scenario. You need to create a chart as shown in the following exhibit. Which field should you use for each area? To answer, drag the appropriate fields to the correct areas. Each field may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation: Explanation Axis: Month Year Legend: ChanelName Values: SalesAmount

NEW QUESTION: 3 STP機能を左から右の正しい説明にドラッグアンドドロップします **Answer:** Explanation:

NEW QUESTION: 4 Sie müssen die Sicherheitsanforderungen für die Anbieter erfüllen. Was sollte man tun? **A.** Erstellen Sie im Azure-Portal Gastkonten. **B.** Führen Sie in der Azure Cloud Shell das Cmdlet New-AzureADUser aus und geben Sie den Parameter -UserPrincipalName an. **C.** Fügen Sie im Azure-Portal einen Identitätsanbieter hinzu. **D.** Führen Sie in der Azure Cloud Shell das Cmdlet New-AzureADUser aus und geben Sie den Parameter -UserType an. **Answer: A** Explanation: Explanation* Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources. You can invite guest users to the directory, to a group, or to an application. After you invite a user through any of these methods, the invited user's account is added to Azure Active Directory (Azure AD), with a user type of Guest. The guest user must then redeem their invitation to access resources. An invitation of a user does not expire. The invitation will include a link to create a Microsoft account. The user can then authenticate using their Microsoft account. In this question, the vendors already have Microsoft

accounts so they can authenticate using them. Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/b2b/add-users-administrator> Topic 2, Fabrikam, Inc. This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Overview Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide. Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States. Existing Environment Active Directory Environment The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication. Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts. All users authenticate to on-premises applications by signing in to their device by using a UPN format of . Fabrikam does NOT plan to implement identity federation. Network Infrastructure Each office has a high-speed connection to the Internet. Each office contains two domain controllers. All domain controllers are configured as a DNS server. The public zone for fabrikam.com is managed by an external DNS server. All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed. All shared company documents are stored on a Microsoft SharePoint Server farm. Requirements Planned Changes Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription. Fabrikam plans to implement two pilot projects: * Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365. * Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users. Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses. Technical Requirements Fabrikam identifies the following technical requirements: * All users must be able to exchange email messages successfully during Project1 by using their current email address. * Users must be able to authenticate to cloud services if Active Directory becomes unavailable. * A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center. * Microsoft Office 365 ProPlus applications must be installed from a network share only. * Disruptions to email address must be minimized. Application Requirements Fabrikam identifies the following application requirements: * An on-premises web application named App1 must allow users to complete their expense reports online. * The installation of feature updates for Office 365 ProPlus must be minimized. Security Requirements Fabrikam identifies the following security requirements: * After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN. * The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically. * After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically. * The principle of least privilege must be used.
