**NEW QUESTION: 1**What should you create to configure AG2?**A.** URL path-based routing rules**B.** an additional public IP address**C.** basic listeners**D.** basic routing rules**E.** multi-site listeners

**Answer: E**  
**Explanation:**Topic 5, Case Study  
Background  
Best For You Organics Company is a global restaurant franchise that has multiple locations. The company wants to enhance user experiences and vendor integrations. The company plans to implement automated mobile ordering and delivery services. Best For You Organics hosts an Azure web app at the URL <https://www.bestforyouorganics.com>. Users can use the web app to browse restaurant location, menu items, nutritional information, and company information. The company developed and deployed a cross-platform mobile app. Requirements  
Chatbot  
You must develop a chatbot by using the Bot Builder SDK and Language Understanding Intelligence Service (LUIS). The chatbot must allow users to order food for pickup or delivery. The chatbot must meet the following requirements:  
\* Ensure that chatbot is secure by using the Bot Framework connector.  
\* Use natural language processing and speech recognition so that users can interact with the chatbot by using text and voice. Processing must be server-based.  
\* Alert users about promotions at local restaurants.  
\* Enable users to place an order for delivery or pickup by using their voice.  
\* Greet the user upon sign-in by displaying a graphical interface that contains action buttons.  
\* The chatbot greeting interface must match the formatting of the following example:  
Vendor API  
Vendors receive and provide updates for the restaurant inventory and delivery services by using Azure API Management hosted APIs. Each vendor uses their own subscription to access each of the APIs. APIs must meet the following conditions:  
\* API usage must not exceed 5,000 calls and 50,000 kilobytes of bandwidth per hour per vendor.  
\* If a vendor is nearing the number of calls or bandwidth limit, the API must trigger email notifications to the vendor.  
\* API must prevent API usage spikes on a per-subscription basis by limiting the call rate to 100 calls per minute.  
\* The Inventory API must be written by using ASP.NET Core and Node.js.  
\* The API must be updated to provide an interface to Azure SQL Database objects must be managed by using code.  
\* The Delivery API must be protected by using the OAuth 2.0 protocol with Azure Active Directory (Azure AD) when called from the Azure web app. You register the Delivery API and web app in Azure AD. You enable OAuth 2.0 in the web app.  
\* The delivery API must update the Products table, the Vendor transactions table, and the Billing table in a single transaction. The Best For You Organics Company architecture team has created the following diagram depicting the expected deployments into Azure:  
Architecture Issues  
Delivery API  
The Delivery API intermittently throws the following exception:

```
"System.Data.Entity.Core.EntityCommandExecutionException: An error occurred while executing the command definition. See the inner exception for details.
```

```
-->System.Data.SqlClient.SqlException: A transport-level error has occurred when receiving results from the server. (provider: Session Provider, error: 19- Physical connection is not usable)"  
Chatbot greeting  
The chatbot's greeting does not show the user's name. You need to
```

debug the chatbot locally. Language processing  
Users report that the bot fails to understand when a customer attempts to order dishes that use Italian names. App code  
Relevant portions of the app files are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong.

**NEW QUESTION: 2** Balance on current account + balance of capital account + balance on reserves account is equal to \_\_\_\_\_  
**A.** None of the above **B.** 0 **C.** 1 **D.** 2 **Answer: D**
