Answer: C

NEW QUESTION: 2 Where does Endurant Cache stage its write cache?
A. DRAM
B. DISK
C. SSD
D. NVRAM
Answer: B

NEW QUESTION: 3 From the variance F-test shown above, which of these conclusions is/are valid?
A. The variance between the class score distribution is significantly different
B. The variance between the class score distribution is not significantly different
C. There are not enough data points to make any statistical conclusions
D. This test applies only to Non-normal Data at 99 % confidence
E. This test applies only to Normal Distributed data at 99 % confidence
Answer: A

NEW QUESTION: 4 Which of the following will significantly affect the standard information security governance model?
A. Complexity of the organizational structure
B. Cultural differences between physical locations
C. Currency with changing legislative requirements
D. Number of employees
E. Explanation: Complexity of the organizational structure will have the most significant impact on the Information security governance model. Some of the elements that impact organizational structure are multiple business units and functions across the organization.
Answer: A Explanation: is incorrect. Currency with changing legislative requirements should not have major impact once good governance models are placed, hence, governance will help in effective management of the organization's ongoing compliance.
Answer: B and D are incorrect. The numbers of employees and the distance between physical locations have less impact on Information security models as well-defined process, technology and people components together provide the proper governance.
