Once you have made your choice, you can get the favorable version of C_S4CPR_2408 download pdf immediately.

NEW QUESTION: 1 HOTSPOT In the screenshot below, click the icon of the OS X Mountain Lion System Preferences pane where you can disable the feature that restores windows when apps are reopened. **Answer:** Explanation: Explanation:

NEW QUESTION: 2 You have a web service that is used to pay for food deliveries. The web service uses Azure Cosmos DB as the data store. You plan to add a new feature that allows users to set a tip amount. The new feature requires that a property named tip on the document in Cosmos DB must be present and contain a numeric value. There are many existing websites and mobile apps that use the web service that will not be updated to set the tip property for some time. How should you complete the trigger? NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation
Box 1: getContext().getRequest();
Box 2: if(isNaN(i)["tip"]) ..In JavaScript, there are two ways to check if a variable is a number :isNaN() - Stands for "is Not a Number", if variable is not a number, it return true, else return false.typeof - If variable is a number, it will returns a string named "number".
Box 3:r.setBody(i); // update the item that will be created

NEW QUESTION: 3 Contoso uses a SharePoint site that contains subsites. Each subsite represents different projects. Each project site is based on a team site template and stores information and documents. Contoso has five teams: Manufacturing, Sales, Administration, Marketing, and IT. You must create a different look and feel for each team site such that any visitor to the site can identify the team by looking at the colors, fonts, and background image of the site. You need to create a different look and feel for each team. What should you do? (Each correct answer presents part of the complete solution. Choose all that apply.)
A. From the Web Designer Galleries, choose Composed Looks and create a new item for each team site. Specify the title, URL of the master page, theme, background image, and font schema file.
B. Create a new font XML schema with a font specification for each team.
C. From SharePoint Designer, go to Content Types. Right-click and select Content Type Settings.
D. On the Site Settings page in

the Look and Feel section, choose Change the look.**E.** Get a site background image for each team and upload it to the site collection images library. Then create a new master page for each team site by using the Master Page Gallery. Set the version to 15.**F.** Open Contoso Corporate Microsoft PowerPoint Slides Template, save the template as ContosoCorporate.master, and then upload it to the Theme Gallery.**Answer: A,C,E****Explanation:**
B:*Content types enable site users to quickly create specialized kinds of content by using the New Item or New Document command in a list or library. Content types provide site owners a way to make sure that that content is consistent across sites. Site owners can pre-configure specific details about the content when they set up content types for a site, list, or library.
*Define content types If your group works with several types of files, such as worksheets, presentations, and documents, you can extend the functionality of your library by enabling and defining multiple content types. Content types add flexibility and consistency across multiple libraries. Each content type can specify a template and even workflow processes. The templates act as a starting point, for formatting and any boilerplate text and for properties that apply to the documents of that type, such as department name or contract number.**Reference:** Best practices for creating and managing team sites
C: To map a master page to a SharePoint site
1.In Site Settings for the designated site, under the Look and Feel section, choose Master Page.
2.On Site Master Page Settings, select one of the two options for the Site Master Page or System Master Page sections:
2a. Inherit site master page from parent site Choose this option if you are configuring a child SharePoint site and want to use the parent master page.
2b. Specify a master page to be used by this site and all sites that inherit from it Choose this option if you want to map a specific master page to the site, or if you want to map a specific master page for administrative pages. A drop-down box named Default or All Channels is available for you, depending on your site or system configuration, so you can select a specific master page stored in the master page gallery. Select the desired master page from the drop-down box.
3. Choose OK.**Reference:** How to: Apply a master page to a site in SharePoint 2013
D:* A Composed Look is made up of:Master PagesCSSColor palettesFont palettesBackground image* This means we can package a master page with its CSS, color palettes, font palettes and background image and have it deployed in the enterprise. With Composed Looks, you can now offer your Power Users a list of branded looks and allow them to choose an appropriate look as well as giving them limited control to make changes to the colors, image or font. You could be providing them Composed Looks.**Reference:** Step by Step: Create a SharePoint 2013 Composed Look You plan to create a search-driven navigation that supports the Cross-site Publishing Feature.
