NEW QUESTION: 1 Which of the following would be used in an IP-based video conferencing deployment? (Select TWO).
A. Bluetooth
B. Codec
C. SIP
D. RS-232
E. 56k modem
Answer: B,C
Explanation: The term "codec" is a concatenation of "encoder" and "decoder". In video conferencing, a codec is software (or can be hardware) that compresses (encodes) raw video data before it is transmitted over the network. A codec on the receiving video conferencing device will then decompress (decode) the video signal for display on the conferencing display. The Session Initiation Protocol (SIP) is a protocol for initiating an interactive user session that involves multimedia elements such as voice, chat, gaming, or in this case video.

NEW QUESTION: 2 DRAG DROP You work as a Network Administrator for Blue Well Inc. The company has a TCP/IP-based network environment. The network contains Cisco switches and a Cisco Catalyst router. The network is configured as shown in the image below: You want to enable Host A to access the Internet. For this, you need to configure the default gateway settings. Choose the appropriate address to accomplish the task.
Select and Place:
Answer:
Explanation: Explanation/Reference: Explanation: According to the question, you are required to configure the default gateway setting on Host A so that users can access the Internet through it. For a computer to communicate with computers on another segment in a routed network, it is important to configure the default gateway. In order to accomplish the task, you will have to set the address 192.168.19.203 as the default gateway address.
