NEW QUESTION: 4Your network contains a server named Server1.The Active Directory Rights Management Services (AD RMS) server role is installed on Server1.An administrator changes the password of the user account that is used by AD RMS.You need to update AD RMS to use the new password.Which console should you use?**A.** Active Directory Users and Computers**B.** Component Services**C.** Active Directory Rights Management Services**D.** Services**Answer: C**

Explanation:

<http://social.technet.microsoft.com/wiki/contents/articles/13034.ad-rms-how-to-change-the-rms-serviceaccount-password.aspx>AD RMS How To: Change the RMS Service Account Password The Active Directory Rights Management Services management console provides a wizard to change or update the AD RMS service account. The most common use for this process is to update the service account password when it has been changed.It is important to use this process to update or change the AD RMS service account. This ensures the necessary components are updated properly. These processes include, but are not limited to the following items.-Ensure the service account meets the criteria (is a domain account, is not the domain account that provisioned RMS, and etc.)-Temporarily suspends RMS functionality on the server during the change-Updates the RMS local groups-Updates the database role for the service account-Updates and restarts the MSMQ and logging services-Updates the service account for the _DRMSAppPool1 web application pool-Updates appropriate AD RMS configuration database tables There are important requirements to run this wizard. Must be logged on to the AD RMS server Account running the wizard must be:-- *A local administrator on the RMS server,*A member of the AD RMS Enterprise Administrators group, and*A SQL

SysAdmin on the AD RMS instance Lastly, this must be performed on each server of the AD RMS cluster-
