NEW QUESTION: 1 Which two statements are true about the security-related tags in a valid Java EE deployment descriptor? (Choose two) **A.** A given <auth-constraint> tag can apply to only one <web-resource-collection> tag. **B.** It is possible to construct a valid <security-constraint> tag such that, for a given resource user roles can access that resource. **C.** A given <web-resource-collection> tag can contain from zero to many <url-pattern> tags. **D.** A <security-constraint> tag can have many <web-resource-collection> tags. **E.** Every <security-constraint> tag must have at least one <http-method> tag. **Answer: B,D**

NEW QUESTION: 2 A Solutions Architect is designing a highly available and reliable solution for a cluster of Amazon EC2 instances. The Solutions Architect must ensure that any EC2 instance within the cluster recovers automatically after a system failure. The solution must ensure that the recovered instance maintains the same IP address. How can these requirements be met? **A.** Create an Auto Scaling group for each EC2 instance that has a minimum and maximum size of 1. **B.** Create a new t2.micro instance to monitor the cluster instances. Configure the t2.micro instance to issue an `aws ec2 reboot-instances` command upon failure. **C.** Create an AWS Lambda script to restart any EC2 instances that shut down unexpectedly. **D.** Create an Amazon CloudWatch alarm for the `StatusCheckFailed_System` metric, and then configure an EC2 action to recover the instance. **Answer: C** Explanation: Explanation References:

<https://docs.aws.amazon.com/AWSEC2/latest/UserGuide/ec2-instance-recover.html>

NEW QUESTION: 3 DRAG DROP You are creating a method that saves information to a database. You have a static class named `LogHelper`. `LogHelper` has a method named `Log` to log the exception. You need to use the `LogHelper.Log` method to log the exception raised by the database server. The solution must ensure that the exception can be caught by the calling method, while preserving the original stack trace. How should you write the catch block? (Develop the solution by selecting and ordering the required code snippets. You may not need all of the code snippets.) **Answer:** Explanation:

NEW QUESTION: 4 A new customer is interested in an Isilon Gen 6 solution to replace their sprawling and outdated Linux environment.
