The whole payment process only lasts a few seconds as long as there has money in your credit card, JN0-231 Questions | 100% Valid JN0-231 Dumps with Verified Answers.

These tools will definitely be guiding you in the right manner and carry **Valid JN0-231 Exam Fee** you forward smoothly in a great way, Over 50% of the account executives and directors have been with the Group for more than ten years.

**NEW QUESTION: 1** Which of the following clarification steps should be taken if apps are not appearing on a deployment client? (Select all that apply.) **A.** Check the content of SPLUNK\_HOME/etc/apps of the deployment server. **B.** Check serverclass.conf of the deployment server. **C.** Search for relevant events in splunkd.log of the deployment server. **D.** Check deploymentclient.conf of the deployment client. **Answer: A,B,D**

**NEW QUESTION: 2** Which Cisco technology secures the network through malware filtering, category-based control, and reputation-based control? **A.** Cisco ASA 5500 Series appliances **B.** Cisco WSAC. **C.** Cisco remote-access VPNs **D.** Cisco IPS **Answer: B**

**NEW QUESTION: 3** Which two statements about the host address 172.150.100.10/18 are true? (Choose two.) **A.** The network address is 172.150.0.0 **B.** The network address is 172.150.100.0 **C.** The broadcast address is 172.150.100.255 **D.** The broadcast address is 172.150.127.255 **E.** The network address is 172.150.64.0 **F.** The broadcast address is 172.150.255.255 **Answer: D,E**

**NEW QUESTION: 4** You are configuring Wireshark on a Cisco Catalyst 4500E Switch with a Supervisor 8. Which three actions can you take to prevent the capture from overloading the CPU? (Choose three.) **A.** Attach the specific ports that are part of the data path. **B.** Configure a policy map, class map, and an access list to express the match conditions. **C.** Reconfigure the buffers to accommodate the additional traffic. **D.** Use an appropriate ACL. **E.** Use an in-line filter. **F.** Add memory to the Supervisor. **Answer: A,D,E** Explanation: Because packet forwarding typically occurs in hardware, packets are not copied to the CPU for software processing. For Wireshark packet capture, packets are copied and delivered to the CPU, which causes an increase in CPU usage. To avoid high CPU, do the following: - Attach only relevant ports. - Use a class map, and secondarily, an access list to express match conditions. If neither is viable, use an explicit, in-line filter. - Adhere closely to the filter rules. Restrict the traffic type (such as, IPv4 only) with a restrictive, rather than relaxed ACL, which elicits unwanted traffic.
