This set of posts, Passing the CIW 1D0-623 exam, will help you answer those questions, Pass your dream certification with a risk-free investment.

NEW QUESTION: 1You need to transfer knowledge of the Microsoft Dynamics solution to the customer resources. You also need to train the people who will be using and maintaining the system after Go-live.Which Sure Step Cross-Phase provides information about these dependencies?**A.** Quality and Testing Cross-Phase**B.** Training Cross-Phase**C.** Communication Cross-Phase**D.** Deployment Cross-Phase**Answer: B**

NEW QUESTION: 2Case Study 5 - Wide World ImportersBackgroundWide World Importers is moving all their datacenters to Azure. The company has developed several applications and services to support supply chain operations and would like to leverage serverless computing where possible.Current environmentWindows Server 2016 virtual machineThis virtual machine (VM) runs Biz Talk Server 2016. The VM runs the following workflows:* Ocean Transport - This workflow gathers and validates container information including container contents and arrival notices at various shipping ports.* Inland Transport - This workflow gathers and validates trucking information including fuel usage, number of stops, and routes.The VM supports the following REST API calls:* Container API - This API provides container information including weight, contents, and other attributes.* Location API - This API provides location information regarding shipping ports of call and truck stops.* Shipping REST API - This API provides shipping information for use and display on the shipping website.Shipping DataThe application uses MongoDB JSON document storage database for all container and transport information. Shipping Web SiteThe site displays shipping container tracking information and container contents. The site is located at <http://shipping.wideworldimporters.com> Proposed solution The on-premises shipping application must be moved to Azure. The VM has been migrated to a new Standard_D16s_v3 Azure VM by using Azure Site Recovery and must remain running in Azure to complete the BizTalk component migrations. You create a Standard_D16s_v3 Azure VM to host BizTalk Server. The Azure architecture diagram for the proposed solution is shown below: Shipping Logic AppThe Shipping Logic app must meet the following requirements:* Support the ocean transport and inland transport workflows by using a Logic App.* Support industry-standard protocol X12 message format for various messages including vessel content details and arrival notices.* Secure resources to the corporate VNet and use dedicated storage resources with a fixed costing model.* Maintain on-premises connectivity to support legacy applications and final BizTalk migrations.Shipping Function appImplement secure function endpoints by using app-level security and include Azure Active Directory (Azure AD).REST APIs The REST API's that support the solution must meet the following requirements:* Secure resources to the corporate VNet.* Allow deployment to a testing location within Azure while not incurring additional costs.* Automatically scale to double capacity during peak shipping times while not causing application downtime.* Minimize costs when selecting an Azure payment model.Shipping dataData migration from on-premises to Azure must minimize costs and downtime.Shipping websiteUse Azure Content Delivery Network (CDN) and ensure maximum performance for dynamic content while minimizing latency and costs.IssuesWindows Server 2016 VMThe VM shows high network latency, jitter, and high CPU utilization. The VM is critical and has not been backed up in the past. The VM must enable a quick restore from a 7-day

snapshot to include in-place restore of disks in case of failure. Shipping website and REST APIs
The following error message displays while you are testing the website: Hotspot Question
You need to update the APIs to resolve the testing error. How should you complete the Azure CLI
command? To answer, select the appropriate options in the answer area. NOTE: Each correct
selection is worth one point. **Answer:** Explanation: Enable Cross-Origin Resource
Sharing (CORS) on your Azure App Service Web App. Enter the full URL of the site you want to
allow to access your WEB API or * to allow all domains. Box 1: corsBox 2: addBox 3:
allowed-originsBox 4: http://testwideworldimporters.com/References:
