Our CPST-001 exam preparatory has 80%-95% similarity with the real exam.

NEW QUESTION: 1 Which HP ArcSight Logger form factors are available?
A. CD-ROM and online distribution
B. Software distribution and CD-ROM
C. Software distribution and hardware appliance
D. Hardware appliance and USB stick
Answer: C
Explanation: Reference: <http://www.slideshare.net/psvijai/logger-quick-starthyperv53> (slide 7)

NEW QUESTION: 2 Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.
You need to meet the vendor notification requirement
Solution: Update the Delivery API to send emails by using a Microsoft Office 365 SMTP server.
Does the solution meet the goal?
A. No
B. Yes
Answer: A
Explanation: Topic 2, Case Study B Background
You are developer for Prose ware, Inc. You are developing an application that applies a set of governance policies for Proseware's internal services, external services, and applications. The application will also provide a shared library for common functionality.
Requirements
You are a developer for Proseware, Inc. You are developing an application that applies a set of governance policies for Proseware's services, and applications. The application will also provide a shared library for common functionality.
Policy service
You develop and deploy a stateful ASP.NET Core 2.1 web application named Policy service to an Azure App Service Web App. The application reacts to events from Azure Event Grid and performs policy actions based on those events. The application must include the Event Grid Event ID field in all Application Insights telemetry. Policy service must use Application Insights to automatically scale with the number of policy actions that it is performing.
Policies
Log policy
All Azure App Service Web Apps must write logs to Azure Blob storage. All log files should be saved to a named log drop. Logs must remain in the container for 15 days.
Authentication events
Authentication events are used to monitor users signing in and signing out. All authentication events must be processed by Policy service. Sign outs must be processed as quickly as possible.
PolicyLib
You have a shared library named PolicyLib that contains functionality common to all ASP.NET Core web services and applications. The PolicyLib library must:
* Exclude non-user actions from Application Insights telemetry.
* Provide methods that allow a web service to scale itself.
* Ensure that scaling actions do not disrupt application usage.
Other
Anomaly detection service
You have an anomaly detection service that analyzes log information for anomalies. It is implemented as an Azure Machine Learning model. The model is deployed as a web service. If an anomaly is detected, an Azure Function that emails administrators is called by using an HTTP WebHook.
Health monitoring
All web applications and services have health monitoring at the /health service endpoint.
Issues
Policy loss
When you deploy Policy service, policies may not be applied if they were in the process of being applied during the deployment.
Performance issue
When under heavy load, the anomaly detection service undergoes slowdowns and rejects connections.
Notification latency
Users report that anomaly detection emails can sometimes

arrive several minutes after an anomaly is detected. App code EventGridController.cs Relevant portions of the app files are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which they belong. LoginEvent.cs Relevant portions of the app files are shown below. Line numbers are included for reference only and include a two character prefix that denotes the specific file to which they belong.

NEW QUESTION: 3 DRAG DROP You support a Skype for Business Server 2015 environment. A customer reports that they are receiving alerts from the voice gateway and that outbound calls are failing due to no trunks being available. You need to configure performance counters to determine the reason that calls are failing. How should you configure the performance counters? To answer, drag the appropriate counter and server to the correct location or locations in the Solution area. Each voice counter and server may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Each correct answer is worth one point. **Answer:** Explanation:
