NEW QUESTION: 1 A storage administrator wants to configure a Unity system to join the list of arrays remotely monitored for activity and system status using Unisphere Central. The security policy on the Unisphere server was set to "automatic". What additional security information must be specified in the Unisphere Settings window to enable communication with Unisphere Central?
A. Unisphere Central Hash and login credentials
B. Unisphere Central IP address and login credentials
C. Unisphere Central Hash and challenge phrase
D. Unisphere Central IP address and Central Hash
Answer: C
Explanation: Explaination Configure the security policy to specify how storage systems are verified when connecting to Unisphere Central. Automatic verification automatically verifies storage systems when they connect to Unisphere Central using a preconfigured security certificate hash and passphrase.
