**NEW QUESTION: 1** A customer is using AWS for Dev and Test. The customer wants to setup the Dev environment with CloudFormation. Which of the below mentioned steps are not required while using CloudFormation?  
**A.** Create a stack  
**B.** Configure a service  
**C.** Provide the parameters configured as part of the template  
**D.** Create and upload the template  
**Answer: B**  
**Explanation:** Explanation AWS CloudFormation is an application management tool which provides application modelling, deployment, configuration, management and related activities. AWS CloudFormation introduces two concepts: the template and the stack. The template is a JSON-format, text-based file that describes all the AWS resources required to deploy and run an application. The stack is a collection of AWS resources which are created and managed as a single unit when AWS CloudFormation instantiates a template. While creating a stack, the user uploads the template and provides the data for the parameters if required.
