Many candidates are headache about exam Oracle 1z1-770 since some of them find they have no confidence to attend the real test; some of them failed exam again and do not want to fail again.

NEW QUESTION: 1When creating service chains in a cloud networking environment, what is the purpose of a service instance?**A.** It defines the general service parameters of a service.**B.** it is the entity that will be performing a service.**C.** It defines the virtual networks in a service chain.**D.** It is a bit-level copy of an existing service**Answer: C**

NEW QUESTION: 2You are a database administrator for a Microsoft SQL Server 2014 environment.You want to deploy a new application that will scale out the workload to at least five different SQL Server instances.You need to ensure that for each copy of the database, users are able to read and write data that will then be synchronized between all of the database instances.Which feature should you use?**A.** Availability Groups**B.** Peer-to-Peer Replication**C.** Database Mirroring**D.** Log Shipping**Answer: B****Explanation:**Peer-to-peer replication provides a scale-out and high-availability solution by maintaining copies of data across multiple server instances, also referred to as nodes. Built on the foundation of transactional replication, peer-to-peer replication propagates transactionally consistent changes in near real-time. This enables applications that require scale-out of read operations to distribute the reads from clients across multiple nodes. Because data is maintained across the nodes in near real-time, peer-to-peer replication provides data redundancy, which increases the availability of data.
