NEW QUESTION: 1You are creating an automation for a form on a web application. Your automation enters data when the web page matches. The web application form contains several web controls, which seem to have the same object level hierarchy in the Object Explorer. You notice that the automation fails to submit the data on the first click of the Submit button. However, the data submits usually after the second or third click. When is the appropriate time to invoke the PerformClick method?**A.** Review the RuntimeLog for the order in which the controls are matched. In the automation, add the last matched control's wait method before the PerformClick method.**B.** Create a loop within your automation that invokes the PerformClick method until the data finally submits.**C.** Place a long a pause before the PerformClick method in the automation.**D.** Open the Windows date/time clock menu and count the number of seconds it takes before invoking the PerformClick method. Then set a pause before the PerformClick method for that calculated length of time.**Answer: D**

NEW QUESTION: 2A customer has written an application that uses Amazon S3 exclusively as a data store. The application works well until the customer increases the rate at which the application is updating information. The customer now reports that outdated data occasionally appears when the application accesses objects in Amazon S3. What could be the problem, given that the application logic is otherwise correct?**A.** The application is reading objects from Amazon S3 using parallel object requests.**B.** The application is updating records by writing new objects with unique keys.**C.** The application is updating records by overwriting existing objects with the same keys.**D.** The application is reading parts of objects from Amazon S3 using a range header.**Answer: C**

NEW QUESTION: 3You have a Microsoft 365 subscription. Auditing is enabled. A user named User1 is a member of a dynamic security group named Group1. You discover that User1 is no longer a member of Group1. You need to search the audit log to identify why User1 was removed from Group1. Which two actions should you use in the search? To answer, select the appropriate activities in the answer area. NOTE: Each correct selection is worth one point.**Answer:** Explanation: ExplanationReferences: <https://docs.microsoft.com/en-us/office365/securitycompliance/search-the-audit-log-in-securi>
