NEW QUESTION: 2This QFD matrix was used in the design process for a ball point pen. What symbol is appropriate for the square labeled 12?**A. 0****B. 1****C. none of the above****D. 2****Answer: C**

NEW QUESTION: 3**A. Option C****B. Option D****C. Option A****D. Option B****Answer: A**

NEW QUESTION: 4You use a computer that has Windows 8.1 Pro installed.Your personal files are stored in a storage pool that is distributed across multiple USB drives.You need to configure a daily backup solution that meets the following requirements:- Automatically backs up all of your personal files that are located in the storagepool.- Automatically backs up operating system files.- Ensures that you can restore any file.What should you do?**A. Turn on File History.****B. Configure system protection.****C. Create a recovery drive.****D. Configure Windows 7 File Recovery.****Answer: D**Explanation:
<http://windows.microsoft.com/en-us/windows-8/storage-spaces-pools>Storage Spaces: FAQ
What is Storage Spaces?Storage Spaces lets you group drives together in a storage pool. Then you can use poolcapacity to create storage spaces.Storage spaces are virtual drives that appear in File Explorer. You can use them like anyother drive, so it's easy to work with files on them. You can create large storage spaces and add more drives to them when you run low onpool capacity.If you have two or more drives in the storage pool, you can create storage spaces that won't be affected by a drive failure-or even the failure of two drives, if you create a three-way

mirror storage space.

<http://blogs.technet.com/b/keithmayer/archive/2012/08/27/backup-amp-recovery-of-windows-8-windows8-itpro-tipoftheday.aspx> Backup and Recovery of Windows 8 & Windows 8.1 - Tip-of-the-Day Update for Windows 8.1: Note that System Image Backup in Windows 8.1 has been moved to the lower left corner of the File History tool in Control Panel as shown below. In addition, the Windows 7 File Recovery tool in Control Panel has been renamed to the Recovery tool in Windows 8.1. Launching Windows System Backup Windows System Backup is still included in Windows 8! To launch the Windows Backup tool, open the Control Panel -> Windows 7 File Recovery applet and click the "Set up Backup" button. Alternatively, you can launch "sdclt.exe" from the Command Prompt to start this applet. All of the old familiar options are there! Using Windows Backup, you can backup a full system image or selected files & folders to an external drive or network location. You can also create a system repair disc for repairing and restoring the system in the event that you encounter any boot issues. Further information: System protection tab in Windows 8:

<http://technet.microsoft.com/en-us/library/dn390929.aspx> Windows Server Backup and Storage Pools Backup and recovery process and storage pools Windows Server Backup does not differentiate a storage pool from other storage. Therefore the presence of a storage pool (both in the online mode and offline Windows RE mode) and its storage space are handled by Windows Server Backup in the same way as normal disks and volumes. Windows Server Backup can be used for any backup or recovery operations either to or from storage pool disks.
