Explanation: The difference between the carrying amount of an asset or liability and its tax base is a temporary difference (TD). A taxable

(deductible) TD results in taxable deductible) amounts in the future when the carrying amount of the asset or liability is recovered or settled. The tax base is the amount attributed for tax purposes to an asset or liability. The tax base of an asset is the amount deductible against future taxable economic benefits when the asset's carrying amount is recovered. The tax base of a liability is the portion of the carrying amount that will not be deductible against future taxable economic benefits for tax purposes. The tax base of revenue received in advance a liability is the portion of the carrying amount taxable in the future. For unearned interest revenue for which the related interest revenue was taxed on a cash basis, the tax base equals zero US \$1.000 carrying amount - \$1.000 not taxable in the future).
