### **NEW QUESTION: 1** Oracle Cloud Infrastructure File Storage

Serviceのスナップショットについて正しい説明はどれですか？ **A.**

スナップショットは増分ではありません **B.**

スナップショットは、ファイルシステムのルートフォルダーの下、.snapshotという名前の非表示ディレクトリに作成されます。 **C.**

スナップショット全体を復元できますが、個々のファイルは復元できません **D.**

OCIコンソールからスナップショットを作成することはできませんが、CLIからのみ作成できます。

**Answer: B** Explanation: The File Storage service supports snapshots for data protection of your file system. Snapshots are a consistent, point-in-time view of your file systems. Snapshots are copy-on-write, and scoped to the entire file system. The File Storage service encrypts all file system and snapshot data at rest. You can take as many snapshots as you need. Data usage is metered against differentiated snapshot data. If nothing has changed within the file system since the last snapshot was taken, the new snapshot does not consume more storage

Snapshots are accessible under the root directory of the file system at `.snapshot/name`. For data protection, you can use a tool that supports NFSv3 to copy your data to a different availability domain, region, file system, object storage, or remote location.

**NEW QUESTION: 2** In Ethernet networks, duplex mismatches will lower performance. Which error statistics can be seen if a duplex mismatch is present?  
**A.** collisions on the full-duplex side; runts on the half-duplex side  
**B.** collisions on the half-duplex side; giants on the full-duplex side  
**C.** collisions on the full-duplex side; collisions on the half-duplex side  
**D.** collisions on the half-duplex side; framing errors on the full-duplex side  
**Answer: D**  
Explanation: On an Ethernet connection, a duplex mismatch is a condition where two connected devices operate in different duplex modes, that is, one operates in half duplex while the other one operates in full duplex. This results in the full-duplex side receiving an incomplete frame with CRC error or a runt frame. It does not detect any collision since CSMA/CD is disabled on the full-duplex side. As a result, when both devices are attempting to transmit at (nearly) the same time, the packet sent by the full-duplex end will be discarded and lost due to an assumed collision and the packet sent by the half-duplex device will be delayed or lost due to a CRC error in the frame.

**B.** Automatic selection of a reference operation set  
**C.** Automatic selection based on the selection ID in the material master  
**D.** Manual selection based on settings in the order type-dependent parameters  
**Answer: D**

**NEW QUESTION: 4** A company recently implemented an Amazon S3 lifecycle rule that accidentally deleted objects from one of its S3 buckets. The bucket has S3 versioning enabled. Which actions will restore the objects? (Choose two.)  
**A.** Use the AWS CLI to delete the object delete markers while specifying the name of the objects only.  
**B.** Use the AWS CLI to delete the object delete markers while specifying the version IDs of the delete markers.  
**C.** Modify the existing lifecycle rule to delete the object delete markers that were created.  
**D.** Use the AWS Management Console to delete the object delete markers.
