Our employees fulfill their duty and responsibility [C1000-177](#) to help customers solve every issue or questions you may have during the usage process.

NEW QUESTION: 1You administer computers that run Windows 8 Enterprise in an Active Directory domain in a single Active Directory Site. All user account objects in Active Directory have the Manager attribute populated. The company has purchased a subscription to Windows Intune. The domain security groups are synchronized with the Microsoft Online directory. You create a Windows Intune group that specifies a manager as a membership criterion. You notice that the group has no members. You need to ensure that users that meet the membership criteria are added to the Windows Intune group. What should you do? **A.** Ensure that the user who is performing the search has been synchronized with the Microsoft Online directory. **B.** Force Active Directory replication within the domain. **C.** Synchronize the Active Directory Domain Service (AD DS) with the Microsoft Online directory. **D.** Ensure that all user accounts are identified as synchronized users. **Answer: D** Explanation: Explanation/Reference: Explanation: For users and security groups to appear in the Windows Intune administrator console, you must sign in to the Windows Intune account portal and do one of the following: Manually add users or security groups, or both, to the account portal. Use Active Directory synchronization to populate the account portal with synchronized users and security groups. The Windows Intune cloud service enables you to centrally manage and secure PCs through a single web-based console so you can keep your computers, IT staff, and users operating at peak performance from virtually anywhere without compromising the essentials: cost, control, security, and compliance.
