NEW QUESTION: 1Which of the following is NOT a valid power saving technique in recent Mac computers?**A.** Disconnect all peripherals.**B.** Use wireless networks instead of wired networks.**C.** Activate automatic display sleep.**D.** Activate automatic hard disk sleep.**E.** Set up locations optimized for different environments.**Answer: B****Explanation:**Power Saving TechniquesKnowing how to manage the portable computer's energy is important. Here are some tips to help increase the computer's autonomy.**Activate automatic display sleep**In the Energy Saver System Preferences pane**Activate automatic hard disk sleep**In the Energy Saver System Preferences pane. The default is on.**Turn off AirPort Disconnect peripherals**Some peripherals are not self-powered. A USB mouse, for example, or FireWire hard disk (even removed from the desktop). These devices draw power from the portable computer, even if they're not actively in use.**Keep a close eye on the battery level**Elect to show the battery in the menu bar and show either time remaining or percent remaining. However, be careful: this is only an estimation based on the battery's current consumption. Thus, the menu bar can display 2 hours of remaining autonomy, and the battery will last only 1h30 when the hard drive starts spinning. The estimated time remaining will rise again if the hard drive goes back to sleep.**Reduce screen brightness**A bright screen can deplete up to 1/3 of the battery. You can dim the screen brightness almost to the maximum and still be able to work without any problem.**Use the power adapter as often as you can**Use applications suited to nomadic use if you type entire pages of text, prefer a light word processing application (like TextEdit) to Microsoft Word, which is quite resource consuming. Games and graphics applications like Adobe Photoshop keep the hard disk active and so drain the battery more quickly. Some programs are more suitable than others for a nomadic use of the portable computer.**Set up locations files optimized for different environments**Suggest prioritizing different network interfaces for each place that the customer uses his other computer.**Open Files Simultaneously**
