**NEW QUESTION: 2**A customer reports that it cannot establish a vPC peer link between two Cisco Nexus 5548UP Switches. The interfaces on both switches are configured and cabled correctly. The interface status is up/down on switch 1 and up/up on switch 2. Which three steps are taken to isolate the root cause? (Choose three.)**A.** swap the fiber-optic cable with one known to be good**B.** swap the transceivers between the two interfaces**C.** swap the ends of the fiber-optic cable**D.** ask the customer if the link was ever functional**E.** determine whether the fiber-optic cable type (single mode or multimode) matches the X2 modules**Answer: A,B,C**

**NEW QUESTION: 3**HOTSPOTYou implement DB2.You need to configure the tables in DB2 to host the data from DB1. The solution must meet the requirements for DB2.Which type of table and history table storage should you use for the tables? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.**Answer:**  
Explanation:Explanation:From Scenario: Relecloud plans to implement a data warehouse named DB2.Box 1: Temporal tableFrom Scenario:Relecloud identifies the following requirements for DB2:Users must be able to view previous versions of the data in DB2 by using aggregates.DB2 must be able to store more than 40 TB of data.A system-versioned temporal table is a new type of user table in SQL Server 2017, designed to keep a full history of data changes and allow easy point in time analysis. A temporal table also contains a reference to another table with a mirrored schema. The system uses this table to automatically store the previous version of the row each time a row in the temporal table gets updated or deleted. This additional table is referred to as the history table, while the main table that stores current (actual) row versions is referred to as the current table or simply as the temporal table.

**NEW QUESTION: 4**An agile team member received certification on a new tool: however, this learn member is complaining that the rest of the team is not using the tool due to lack of knowledge How should the servant leader apply emotional intelligence to leverage this situation to benefit the project?**A.** Promote the team member to product owner to leverage the new knowledge with the clients**B.** Request budget to reward the team member so others will be motivated to obtain the same certification**C.** Provide an incentive to team members who begin using the new tool on this project.**D.** Ask the team member to use their recently acquired

knowledge to develop and provide training to the team**Answer: D**
