**NEW QUESTION: 3** Your company has the divisions shown in the following table. You plan to deploy a custom application to each subscription. The application will contain the following: A resource group An Azure web app Custom role assignments An Azure Cosmos DB account You need to use Azure Blueprints to deploy the application to each subscription. What is the minimum number of objects required to deploy the application? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point.

**Answer:** Explanation: Explanation: Box 1: 2 One management group for East, and one for West. When creating a blueprint definition, you'll define where the blueprint is saved. Blueprints can be saved to a management group or subscription that you have Contributor access to. If the location is a management group, the blueprint is available to assign to any child subscription of that management group. Box 2: 1 One definition as the you plan to deploy a custom application to each subscription. With Azure Blueprints, the relationship between the blueprint definition (what should be deployed) and the blueprint assignment (what was deployed) is preserved. Box 3: 4 One assignment for each subscription. Reference: <https://docs.microsoft.com/en-us/azure/governance/blueprints/overview>
