NEW QUESTION: 1 Which two statements are true? (Choose two.)
A. An enterprise bean's transaction information can be accessed by external tools only if the information is contained in an XML deployment descriptor.
B. A given enterprise bean's transaction information is immutable because it is deployed across various containers.
C. Typically, remotely accessible objects should be coarse-grained.
D. If a client accesses an enterprise bean locally such access must be mediated by the EJB container.
E. If a container provides services NOT required by the EJB specification, then that container is NOT considered to be an EJB container.
Answer: C,D
Explanation: Explanation/Reference: Enterprise JavaBeans 3.1, Final Release: 3.2.3 Choosing Between a Local or Remote Client View Remote calls are potentially expensive. They involve network latency, overhead of the client and server software stacks, argument copying, etc. Remote calls are typically programmed in a coarse-grained manner with few interactions between the client and bean.
21.3 Container Provider's Responsibility This section defines the container's responsibilities for providing the runtime environment to the enterprise bean instances. The requirements described here are considered to be the minimal requirements; a container may choose to provide additional functionality that is not required by the EJB specification.

NEW QUESTION: 2 They are active as an IT consultant for a fashion company. The company uses an Active Directory forest with a single domain. The manager of the company reports that it gets displayed a desktop background, whom he has not chosen himself. In an interview with the IT department, you will learn that a former colleague more than 20 Group Policy objects (GPOs) created and it has not yet succeeded, determine which GPO configures the desktop background of the manager. How do you support the IT department in solving the problem?
A. Run the Group Policy Results Wizard for the computer account of the manager.
B. Run the Group Policy Results Wizard for the user account of the manager.
C. From Group Policy Management, run the Group Policy Results Wizard.
D. Run the Group Policy Results Wizard for all computer accounts to the domain.
Answer: B
Explanation: Explanation/Reference: Explanation: The configuration of the desktop background is part of the user configuration. By carrying out the Group Policy Results Wizard for the user account of the manager can be found, which GPOs (GPOs) are applied to the order in which the user account of the manager. In addition, the report of the Group Policy Results Wizard can be seen that each GPO is crucial for the effective configuration of the individual directives.

NEW QUESTION: 3 Cisco Configuration ProfessionalでCisco ISRルータからIPSアラートを引き出すことができる2つのプロトコルはどれですか？

(2つを選択してください) **A. FTPB. SSHC. SDEED. HTTPSE. syslogF. TFTP****Answer: C,D**

Explanation:

http://www.cisco.com/en/US/prod/collateral/iosswrel/ps6537/ps6586/ps6634/prod_white_paper0900aecd805c4ea8.html Step 4: Enabling IOS IPS The fourth step is to configure IOS IPS using the following sequence of steps: Step 4.1: Create a rule name (This will be used on an interface to enable IPS) ip ips name <rule name>< optional ACL> router#configure terminal router(config)# ip ips name iosips You can specify an optional extended or standard access control list (ACL) to filter the traffic that will be scanned by this rule name. All traffic that is permitted by the ACL is subject to inspection by the IPS. Traffic that is denied by the ACL is not inspected by the IPS. router(config)#ip ips name ips list ?<1-199> Numbered access listWORD Named access listStep 4.2: Configure IPS signature storage location, this is the directory `ips' created in Step 2 ip ips config location flash:<directory name> router(config)#ip ips config location flash:ips Step 4.3: Enable IPS SDEE event notification ip ips notify sdee router(config)#ip ips notify sdee To use SDEE, the HTTP server must be enabled (via the `ip http server' command). If the HTTP server is not enabled, the router cannot respond to the SDEE clients because it cannot see the requests. SDEE notification is disabled by default and must be explicitly enabled.

NEW QUESTION: 4Outlook用Dynamics365アプリを実装します。

メールをリードレコードに関連付ける必要があります。

あなたは何をすべきか？回答するには、回答領域で適切なオプションを選択します。

注：正しい選択はそれぞれ1ポイントの価値があります。**Answer:** Explanation:Explanation
