NEW QUESTION: 1 A Citrix Administrator configured an external syslog server but is NOT seeing detailed TCP information? What could be causing this? **A.** Log level is NOT enabled. **B.** User-defined audit log is NOT configured. **C.** Log facility is NOT configured. **D.** TCP logging is NOT enabled. **Answer: A**

NEW QUESTION: 2 Which two options occur when a server discovery policy is invoked? (Choose two.) **A.** Applies the scrub policy to the server **B.** Creates a service profile for the server with the identity burned into the server at time of manufacture **C.** Executes the qualification in the server discovery policy against the server **D.** Assigns the server to the selected organization, if configured **E.** Analyzes the inventory of the server **Answer: A, C** Explanation:

Explanation/Reference: Explanation: Configuring Server Discovery Policies Server Discovery Policy This discovery policy determines how the system reacts when you add a new server. If you create a server discovery policy, you can control whether the system conducts a deep discovery when a server is added to a chassis, or whether a user must first acknowledge the new server. By default, the system conducts a full discovery. If you create a server discovery policy, the following occurs when a new server starts: The qualification in the server discovery policy is executed against the server. If the server meets the required qualifications, Cisco UCS Manager applies the following to the server: Depending upon the option selected for the action, either discovers the new server immediately or waits for a user to acknowledge the new server Applies the scrub policy to the server Reference:
