NEW QUESTION: 2 SIMULATION Use the following login credentials as needed: To enter your username, place your cursor in the Sign in box and click on the username below. To enter your password, place your cursor in the Enter password box and click on the password below. Microsoft 365 Username: [\[email#160;protected\]](#) Microsoft 365 Password: b#nqvZG*0w*4 The following information is for technical support purposes only: Lab instance: 10658557 You need to ensure that all email sent or received by a user named Admin1 is preserved in Exchange Online. The solution must prevent Admin1 from permanently deleting any email messages for 180 days. To complete this task, sign in to the Microsoft 365 admin center.
A. You need configure a Retention Policy. You could also use a Litigation Hold but Retention Policies are replacing Litigation Holds in future, so a Retention Policy is the way to go.
1. In the Microsoft 365 Compliance Center, go to the Policies section and click Retention.
2. Click the New retention policy link.
3. Enter a name for the policy (such as 'Admin1 Email Retention') and click Next.
4. In the retention period, enter 180 days and click Next.
5. Ensure that only Exchange email is selected. SharePoint sites, OneDrive accounts and Office 365 groups are also selected by default so you may need to deselect them.
6. Click the 'Choose recipients' link for Exchange email.
7. Click the 'Choose recipients' button to open a list of recipients.
8. Select Admin1 and click the Choose button then click the Done button.
9. Click Next.
10. Click the 'Create this policy' button.
B. You need configure a Retention Policy. You could also use a Litigation Hold but Retention Policies are replacing Litigation Holds in future, so a Retention Policy is the way to go.
1. In the Microsoft 365 Compliance Center, go to the Policies section and click Retention.
2. Click the New retention policy link.
3. Enter a name for the policy (such as 'Admin1 Email Retention') and click Next.
4. In the retention period, enter 180 days and click Next.
5. Click the 'Choose recipients' link for Exchange email.
6. Click the 'Choose recipients' button to open a list of recipients.
7. Select Admin1 and click the Choose button then click the Done button.
8. Click Next.
9. Click the 'Create this policy' button.
Answer: A
Explanation: References: <https://docs.microsoft.com/en-us/microsoft-365/compliance/retention-policies>

NEW QUESTION: 3 **A.** Option C **B.** Option B **C.** Option A **D.** Option D **Answer: C**
Explanation: If you want to allow traffic between two zones, such as between the inside zone (using interfaces facing the inside network) and the outside zone (interfaces facing the Internet or less trusted networks), you must create a policy for traffic between the two zones, and that is where a zone pair comes into play. A zone pair, which is just a configuration on the router, is created

identifying traffic sourced from a device in one zone and destined for a device in the second zone. The administrator then associates a set of rules (the policy) for this unidirectional zone pair, such as to inspect the traffic, and then applies that policy to the zone pair. Source: Cisco Official Certification Guide, Zones and Why We Need Pairs of Them, p.380

NEW QUESTION: 4Your company has two servers that run Windows Server 2008 R2 named Server2 and Server3. Both servers have the DNS Server server role installed.
