NEW QUESTION: 2Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.You have a server named Web1 that runs Windows Server 2016.You need to list all the SSL certificates on Web1 that will expire during the next 60 days.Solution: You run the following command.Does this meet the goal?**A.** No**B.** Yes**Answer: A**

NEW QUESTION: 3Which of the following is the most critical item from a disaster recovery point of view?**A.** Hardware/Software**B.** Data**C.** Software Applications**D.** Communication Links**Answer: B**Explanation:The most important point is ALWAYS the data. Everything else can be replaced or repaired.Data MUST be backed up, backups must be regularly tested, because once it is truly lost, it is lost forever.The goal of disaster recovery is to minimize the effects of a disaster or disruption. It means taking the necessary steps to ensure that the resources, personnel, and business processes are able to resume operation in a timely manner . This is different from continuity planning, which provides methods and procedures for dealing with longer-term outages and disasters.The goal of a disaster recovery plan is to handle the disaster and its ramifications right after the disaster hits; the disaster recovery plan is usually very information technology (IT)-focused. A disaster recovery plan (DRP) is carried out when everything is still in emergency mode, and everyone is scrambling to get all critical systems back online.Reference(s) used for this question:Harris, Shon (2012-10-18).
