NEW QUESTION: 2You have an Azure subscription that contains the virtual networks shown in the following table.You need to recommend a connectivity solution that will enable the virtual machines on VNET1 and VNET2 to communicate through the Microsoft backbone infrastructure.What should you include in the recommendation?**A. peering****B. a point-to-site VPN****C. a site-to-site VPN****D. Azure ExpressRoute****Answer: A****Explanation:**Virtual network peering enables you to seamlessly connect Azure virtual networks. Once peered, the virtual networks appear as one, for connectivity purposes. The traffic between virtual machines in the peered virtual networks is routed through the Microsoft backbone infrastructure, much like traffic is routed between virtual machines in the same virtual network, through private IP addresses only. Azure supports:* VNet peering - connecting VNets within the same Azure region* Global VNet peering - connecting VNets across Azure regionsReferences:
