NEW QUESTION: 1A portal change has been requested to add two sections, and one of the sections should display collapsed.Given that the impacted portal is open in Portal Builder, which process(es) could be used?**A.** Only a user can determine which portal sections are collapsed.**B.** Log-in as the system user in order to make the change. Select the Portal Sections library, place a check mark in the select box next to the two sections which are to be added, and click the Add To Portal button. For the section that is to be displayed collapsed by default, in the Portal Layout View select the Collapsed By Default check box. Select the Save button.**C.** Select the Portal Sections library, place a check mark in the select box next to the section which is to be added, and click the Add To Portal button. Place a check mark next to the next section to be added, and click the Add To Portal button. For the section that is to be displayed collapsed by default, in the Portal Layout View select the Collapsed By Default check box. Select the Save button.**D.** This scenario is not feasible because portal sections cannot collapse.
Answer: C

NEW QUESTION: 2You are deploying OSPF on a point-to-multipoint Frame Relay network. The remote sites do not need to be able to communicate with each other and there are a relatively small number of sites (scaling is not a concern).How should you configure OSPF for this topology to minimize the additional routing information injected into the network and keep the configuration size and complexity to a minimum?**A.** Configure the link as OSPF broadcast and configure the hub router to always be the designated router.**B.** Configure the link at the hub router as OSPF point-to-multipoint and at the remote routers as OSPF point-to-point.**C.** Configure the link as OSPF nonbroadcast and manually configure each of the remote sites as a neighbor.**D.** Configure the link as OSPF broadcast and configure a mesh group towards the remote routers.**Answer: A**

NEW QUESTION: 3Limits for resource utilization can be set at different levels within a cloud environment to ensure that no particular entity can consume a level of resources that impacts other cloud customers.Which of the following is NOT a unit covered by limits?**A.** Hypervisor**B.** Service**C.** Virtual machine**D.** Cloud customer**Answer: A****Explanation:**The hypervisor level, as a backend cloud infrastructure component, is not a unit where limits may be applied to control resource utilization. Limits can be placed at the service, virtual machine, and cloud customer levels within a cloud environment.
