two host (A) records named "intranet" in DNS:one pointing to the IP address of Web1 and one pointing to the IP address of Web2.To move to Network Load Balancing (NLB), we just need one host (A) record pointing to the NLB cluster IP address. Therefore, the solution is to delete one of the "intranet" host (A) records and point the remaining"intranet" host (A) record to the NLB cluster IP address.
