## Quiz 2024 Amazon AWS-Certified-Database-Specialty: High-quality AWS Certified Database - Specialty (DBS-C01) Exam Reliable Test Simulator

The following are advantages our AWS-Certified-Database-Specialty exam simulator offers: Free update for one year, We are here to help you in clearing the AWS-Certified-Database-Specialty test by practicing our pdf dumps of Amazon AWS-Certified-Database-Specialty exam once and you will see the magic.

You can ask for a full refund, another choice is changing a new Amazon AWS-Certified-Database-Specialty exam training guide freely if you don't want full refund, We know that it's hard to distinguish which is good or bad.

About our three versions functions, our other service such like: money back guarantee, if you have any suggest or problem about AWS-Certified-Database-Specialty: AWS Certified Database - Specialty (DBS-C01) Exam preparation please email us at the first time.

So after buying our AWS-Certified-Database-Specialty exam braindumps: AWS Certified Database - Specialty (DBS-C01) Exam, if you have any questions please feel free to contact us at any time, we are waiting here for replying your questions and solving your problems any time.

But in order to let the job position to improve **AWS-Certified-Database-Specialty Reliable Test Simulator** spending some money to choose a good training institution to help you pass the exam is worthful, Our AWS-Certified-Database-Specialty practice quiz will provide three different versions, the PDF version, the software version and the online version.

And with our AWS-Certified-Database-Specialty exam questions, Our writers are experts in their field and provide our clients with the most in depth information on exams while ensuring our questions and answers are the most current.

Now what I'm going to introduce for you is APP version.

**NEW QUESTION: 1**You have a server named Server1 that runs Windows Server 2012 R2. On Server1, you configure a custom Data Collector Set (DCS) named DCS1. DCS1 is configured to store performance log data in C:\Logs. You need to ensure that the contents of C:\Logs are deleted automatically when the folder reaches 100 MB in size. What should you configure?  
**A.** The Data Manager settings of DCS1  
**B.** A File Server Resource Manager (FSRM) file screen on the C:\Logs folder  
**C.** A schedule for DCS1  
**D.** A File Server Resource Manager (FSRM) quota on the C:\Logs folder  
**Answer: A**  
**Explanation:** To configure data management for a Data Collector Set 1. In Windows Performance Monitor, expand Data Collector Sets and click User Defined. 2. In the console pane, right-click the name of the Data Collector Set that you want to configure and click Data Manager. 3. On the Data Manager tab, you can accept the default values or make changes according to your data retention policy. See the table below for details on each option. When Minimum free disk or Maximum folders is selected, previous data will be deleted according to the Resource policy you choose (Delete largest or Delete oldest) when the limit is reached. When Apply policy before the data collector set starts is selected, previous data will be deleted according to your selections before the data collector set creates its next log file. When Maximum root path size is selected, previous data will be deleted according to your selections when the root log folder size limit is reached. 4. Click the Actions tab. You can accept the default values or make changes. See the table below for details on each option. 5. When you have finished making your changes, click OK.

**NEW QUESTION: 2**Your multitenant container database, CDB1, is running in ARCHIVELOG mode and has two pluggable databases, HR\_PDB and ACCOUNTS\_PDB. An RMAN backup exists

for the database. You issue the command to open ACCOUNTS\_PDB and find that the USERDATA.DBF data file for the default permanent tablespace USERDATA belonging to ACCOUNTS\_PDB is corrupted. What should you do before executing the commands to restore and recover the data file in ACCOUNTS\_PDB? **A.** Place CDB1 in the mount stage and issue the ALTER PLUGGABLE DATABASE accounts\_pdb CLOSE IMMEDIATE command. **B.** Issue the ALTER PLUGGABLE DATABASE accounts\_pdb RESTRICTED command. **C.** Take the USERDATA tablespace offline in ACCOUNTS\_PDB. **D.** Place CDB1 in the mount stage and then the USERDATA tablespace offline in ACCOUNTS\_PDB. **Answer: C** Explanation: Explanation\* You can take an online tablespace offline so that it is temporarily unavailable for general use. The rest of the database remains open and available for users to access data. Conversely, you can bring an offline tablespace online to make the schema objects within the tablespace available to database users. The database must be open to alter the availability of a tablespace.

**NEW QUESTION: 3** Examine the RMAN commands: **A.** Option C **B.** Option B **C.** Option D **D.** Option A **Answer: C**
