NEW QUESTION: 1An Intrusion Detection System (IDS) is what type of control?**A.** A recovery control.**B.** A directive control.**C.** A preventative control.**D.** A detective control.**Answer: B**
Explanation:These controls can be used to investigate what happen after the fact. YourIDS may collect information on where the attack came from, what port was use, and otherdetails that could be used in the investigation steps."Preventative control" is incorrect. Preventative controls preclude events or actions thatmight compromise a system or cause a policy violation. An intrusion prevention systemwould be an example of a preventative control."Recovery control" is incorrect. Recover controls include processes used to return thesystem to a secure state after the occurrence of a security incident. Backups andredundant components are examples of recovery controls."Directive controls" is incorrect. Directive controls are administrative instruments such aspolicies, procedures, guidelines, and agreements. An acceptable use policy is an exampleof a directive control.References:CBK, pp. 646 - 647
