NEW QUESTION: 1 Which is a responsibility of a risk owner?
A. Determine project risk appetite
B. Own and authorize the use of the risk budget to fund risk responses
C. Manage, monitor and control all aspects of an assigned risk
D. Identify risks to the project that might occur in their department
Answer: C

NEW QUESTION: 2 Refer to the exhibit. Why is the neighbor relationship between R1 & R2 and R1 & R3 an L2-type neighborship?
A. because the area ID on R1 is different as compared to the area ID of R2 and R3
B. because the network type between R1, R2, and R3 is point-to-point
C. because the circuit type on those three routers is L1/L2
D. because the hello interval is not the same on those three routers
Answer: A
Explanation: With IS-IS, an individual router is in only one area, and the border between areas is on the link that connects two routers that are in different areas. A Level 2 router may have neighbors in the same or in different areas, and it has a Level 2 link-state database with all information for inter-area routing. Level 2 routers know about other areas but will not have Level 1 information from its own area.
