**Answer: A, C**  
**Explanation:**  
Explanation/Reference:  
Explanation:  
E: You must perform several steps to enable claims in Server 2012 AD. First, you must upgrade the forest schema to Server 2012. You can do so manually through Adprep, but Microsoft strongly recommends that you add the AD DS role to a new Server 2012 server or upgrade an existing DC to Server 2012.  
B: Once AD can support claims, you must enable them through Group Policy: From the Start screen on a system with AD admin rights, open Group Policy Management and select the Domain Controllers Organizational Unit (OU) in the domain in which you wish to enable claims. Right-click the Default Domain Controllers Policy and select Edit. In the Editor window, drill down to Computer Configuration, Policies, Administrative Templates, System, and KDC (Key Distribution Center). Open KDC support for claims, compound authentication, and Kerberos armoring. Select the Enabled radio button. Supported will appear under Claims, compound authentication for Dynamic Access Control and Kerberos armoring options
