NEW QUESTION: 1 Which of the following questions is less likely to help in assessing identification and authentication controls?
A. Is there a process for reporting incidents?
B. Is a current list maintained and approved of authorized users and their access?
C. Are passwords changed at least every ninety days or earlier if needed?
D. Are inactive user identifications disabled after a specified period of time?
Answer: A
Explanation: We just some common sense to answer this question correctly, why are we going to ask about process reporting for incidents?, does it help relating to identification and authentication?, I don't think so. There are other more interesting questions, password deal with authentication, inactive user IDs are also related to identification. But the most important to me, know if there is a list with authorized users and their current access, this can help you to identify unauthorized activities.

NEW QUESTION: 2 A node joins a cluster in ONTAP 9.1. Which statement is correct about the NTP configuration in this situation?
A. A node that joins a cluster must be manually configured for NTP.
B. A node that joins a cluster automatically adopts the NTP configuration of the cluster.
C. A node that joins a cluster must reboot before running the NTP service.
D. A node that joins a cluster has a separate NTP service.
Answer: B

NEW QUESTION: 3 How can the internals of a component be presented?
A. in a compartment of the component box or component requires port
B. using a complex component connector
C. in a compartment of the component box or via boxes nested within the component box
D. component provides port or a component requires port
Answer: C
