NEW QUESTION: 1 An IT manager is working with a project manager to implement a new ERP system capable of transacting data between the new ERP system and the legacy system. As part of this process, both parties must agree to the controls utilized to secure data connections between the two enterprise systems. This is commonly documented in which of the following formal documents? **A.** Memorandum of Understanding **B.** Information System Security Agreement **C.** Interconnection Security Agreement **D.** Interoperability Agreement **E.** Operating Level Agreement **Answer: C**
Explanation: An interconnection security agreement (ISA) is a security document that details the requirements for establishing, maintaining, and operating an interconnection between systems or networks. It specifies the requirements for connecting the systems and networks and details what security controls are to be used to protect the systems and sensitive data.
