**NEW QUESTION: 1A.** Option EB. Option CC. Option BD. Option HE. Option DF. Option AG. Option FH. Option G**Answer: B**Explanation:ExplanationThe differential backup of the reporting database has failed, so it can't be used.

**NEW QUESTION: 2A.** Option CB. Option BC. Option DD. Option A**Answer: D**Explanation: Source-initiated subscriptions allow you to define a subscription on an event collector computer without defining the event source computers, and then multiple remote event source computers can be set up (using a group policy setting) to forward events to the event collector computer. This differs from a collector initiated subscription because in the collector initiated subscription model, the event collector must define all the event sources in the event subscription.1.Run the following command from an elevated privilege command prompt on the Windows Server domain controller to configure Windows Remote Management: winrm qc q 2.Start group policy by running the following command: %SYSTEMROOT%System32gpedit.msc3.Under the Computer Configuration node, expand the Administrative Templates node, then expand the Windows Components node, then select the Event Forwarding node. 4.Right-click the SubscriptionManager setting, and select Properties. Enable the SubscriptionManager setting, and click the Show button to add a server address to the setting. Add at least one setting that specifies the event collector computer. The SubscriptionManager Properties window contains an Explain tab that describes the syntax for the setting.5.After the SubscriptionManager setting has been added, run the following command to ensure the policy is applied: gpupdate /force.If you want to configure a source computer-initiated subscription, you need to configure the following group policies on the computers that will act as the event forwarders:\* (A) Configure Target Subscription Manager This policy enables you to set the location of the collector computer.

**NEW QUESTION: 3**In which of the following DITSCAP phases is the SSAA developed?**A.** Phase 1 **B.** Phase 4**C.** Phase 3**D.** Phase 2**Answer: A**

**NEW QUESTION: 4**You have two computers that run Windows 10. The computers are enrolled in Microsoft Intune as shown in the following table.Windows 10 update rings are defined in Intune as shown in the following table.You assign the update rings as shown in the following table.What is the effect of the configurations on Computer1 and Computer2? To answer, select the appropriate options in the answer area.NOTE: Each correct selection is worth one point.

**Answer:** Explanation:ExplanationComputer1 and Computer2 are members of Group1. Ring1 is applied to Group1.Note: The term "Exclude" is misleading. It means that the ring is not applied to that group, rather than that group being blocked.References:
