Everything is difficult at beginning, on website, Top one actual lab questions.

NEW QUESTION: 1 Which three statements are true about modifying value definitions? (Choose three.)
A. The values descriptions can be changed to disable a value that is no longer in use.
B. Values can be changed but cannot be deleted after they are defined.
C. The value descriptions or the translated value can be changed to reuse an existing value.
D. The effective dates of a value that is no longer in use could be limited or the value could be disabled.
E. Values cannot be changed or deleted after they are defined.
Answer: C,D,E
Explanation: A (not B): Since individual values can be referenced from many places in your applications, you cannot delete valid values that have already been defined, nor can you change those values. You can, however, change the description of a valid value in the Description field after you query up the value (or the translated value of a Translatable Independent or Translatable Dependent value set). E: If you want to have the value effective for a limited time, you can enter a start date and/or an end date for it. The value is valid for the time including the From and To dates. You cannot delete values from this window because they are referenced elsewhere in the system, but you can disable them at any time. You should not disable or have effective dates for a segment value that you use as a segment default or a default dependent value. Reference: Oracle E-Business Suite Flexfields Guide

NEW QUESTION: 2 You observed in your database that the queries formerly executed in 5 seconds now take longer time. View the Exhibit and analyze the output of the query that you executed to find the problem. Which is the primary concern?
A. the number of chained and migrated rows
B. the number of full table scans
C. the number of rows fetched based on rowid
D. the number of disk sorts
Answer: A

NEW QUESTION: 3 Which group-policy subcommand installs the Diagnostic AnyConnect Report Tool on user computers when a Cisco AnyConnect user logs in?
A. customization value dart
B. smart-tunnel enable dart
C. file-browsing enable
D. anyconnect module value dart
Answer: D
