If none of the options are specified, the UPDATE STATISTICS statement updates all statistics on the table or indexed view.Note: You can update query optimization statistics on a table or indexed view in SQL Server by using SQL Server Management Studio or Transact-SQL. By default, the query optimizer already updates statistics as necessary to improve the query plan; in some cases you can improve query performance by using UPDATE STATISTICS or the stored procedure sp\_updatestats to update statistics more frequently than the default updates.References: <https://docs.microsoft.com/en-us/sql/t-sql/statements/update-statistics-transact-sql?view=sql-server-2017>
