NEW QUESTION: 1You have an Ec2 Instance in a private subnet which needs to access the KMS service. Which of the following methods can help fulfil this requirement, keeping security in perspective Please select:**A.** Use VPC Peering**B.** Use a VPC endpoint**C.** Attach a VPN connection to the VPC**D.** Attach an Internet gateway to the subnet**Answer: B****Explanation:**The AWS Documentation mentions the following You can connect directly to AWS KMS through a private endpoint in your VPC instead of connecting over the internet. When you use a VPC endpoint communication between your VPC and AWS KMS is conducted entirely within the AWS network. Option B is invalid because this could open threats from the internet Option C is invalid because this is normally used for communication between on-premise environments and AWS. Option D is invalid because this is normally used for communication between VPCs For more information on accessing KMS via an endpoint, please visit the following URL <https://docs.aws.amazon.com/kms/latest/developerguide/kms-vpc-endpoint.html> The correct answer is: Use a VPC endpoint Submit your Feedback/Queries to our Experts
