Just come and try!

**NEW QUESTION: 1**You want the system to generate an email notification each time one of the services has changed its state. Which option would send an email message to the system administrator whenever a service changes to the maintenance state?**A.** Use the `scvadm` command to enable the notification service. Set the `-g` maintenance option on the `netnotify` service to send an email when a service enters the maintenance state.**B.** Make an entry in the `/etc/syslog.conf` file to instruct `syslogd` to send an email alert when it receives a message from the SMF facility that a service has changed to the maintenance state.**C.** Use the `setsc` command in ALOM to enable the mail alerts to be sent to a specified email address whenever the fault management facility detects a service change to the maintenance state.**D.** Use the `svccfg setnotify` command to create a notification and send an email when a service enters the maintenance state.**Answer: D****Explanation:**This procedure causes the system to generate an email notification each time one of the services or a selected service has a change in state. You can choose to use either SMTP or SNMP. Normally, you would only select SNMP if you already have SNMP configured for some other reason.By default, SNMP traps are sent on maintenance transitions. If you use SNMP for monitoring, you can configure additional traps for other state transitions.**1.** Become an administrator or assume a role that includes the Service Management rights profile.**2.** Set notification parameters.**Example:**The following command creates a notification that sends email when transactions go into the maintenance state#  
`/usr/sbin/svccfg setnotify -g maintenance mailto:[email&#160;protected]`

**NEW QUESTION: 2**Die Datei `script.sh` im aktuellen Verzeichnis enthält den folgenden Inhalt:#! /bin / bash echo \$ MYVARDie folgenden Befehle werden verwendet, um dieses Skript auszuführen:MYVAR = Wert./script.shDas Ergebnis ist eine leere Zeile anstelle des Inhalts der Variablen MYVAR. Wie sollte MYVAR eingestellt werden, damit `script.sh` den Inhalt von MYVAR anzeigt?**A.** `export MYVAR=value`**B.** `MYVAR=value`**C.** `env MYVAR=value`**D.** `!MYVAR=value`**E.** `$MYVAR=value`**Answer: A**

**NEW QUESTION: 3**Which Cisco device has the sole function at looking at threat detection and mitigation at theEnterprise edge?**A.** Cisco IPS**B.** Cisco ASAC**C.** Cisco IOS router**D.** Cisco Catalyst FWSM**Answer: A****Explanation:**Explanation/Reference:Explanation:
