NEW QUESTION: 1Topic 10, A Datum CorporationCurrent EnvironmentYou plan to upgrade the Microsoft Office SharePoint Server 2007 server farm to SharePoint Server 2010.The branch offices use a third-party Lightweight Directory Access Protocol (LDAP) solution to authenticate users.SharePoint Server 2007 ConfigurationThe SharePoint Server 2007 environment includes the servers configured as shown in the following table.Server1 and Server2 are configured to use a hardware load balancer. Server3 runs Microsoft SQL Server 2000 (64-bit).Technical RequirementsYou plan to create a site collection for the company's pricing information. Documents in the site collection that remain unmodified for 90 days must be deleted automatically. The documents in all other site collections must be retained.Every 120 days, site collection administrators must confirm that their site collections are still in use. If the site collection administrators fail to confirm that their sites are in use, the sites must be deleted automatically.Security Requirements**A.** Two servers that have the Web Server role installed, two servers that have the query component installed, and two servers that have the crawl component installed**B.** Two servers that have the Web Server role, query component, and crawl component installed**C.** Two servers that have the Web Server role and crawl component installed and two servers that have the query component installed**D.** Datum has the following user requirements for the planned SharePoint Server 2010 deployment:-Users must be able to create sites without any help from an administrator.-Users must be able to search for documents in the server farm if a single SharePoint Web server fails.You are a SharePoint administrator for A. Datum Corporation.The company has a main office and a branch office.The company has 2,000 users.You need to design a search solution to meet the company's user requirements. Your solution mustminimize costs.What should you include in the design?**E.** Two servers that have the Web Server role and query component installed, and two servers that have the craw component installed**F.** Datum has the following security requirements for the planned SharePomt Server 2010 deployment:-Users must be assigned the most restrictive permissions possible.-The deployment must support authentication for all branch office users.-Support for the branch office users must not require changes to the client computers.-All

authentications to access SharePoint Server 2010 must use a cryptographic exchange. User Requirements
Answer: B Explanation: Section: Case 10

NEW QUESTION: 2 A customer needs a wired network solution that can recognize and prioritize a wide array of different types of traffic, including casual Web browsing, voice, video, SAP Online, and file sharing. The architect needs to choose between the Aruba 2930F or the 2540 Switch Series for the access layer switch. Why would the architect choose the 2930F rather than the 2540 Switch Series for this customer?
A. The 2930F Series can provide better congestion management with its much deeper buffers.
B. The 2930F Series supports LLDP-MED for detecting VoIP traffic, while the 2540 Series does not.
C. The 2930F Series supports advancing routing, including multi-area OSPF, while the 2540 Series does not.
D. The 2930F Series supports more options for class-based QoS policies than the 2540 Series.
Answer: A

NEW QUESTION: 3 When you want to validate that your software produces the desired behavior for end users, you need to use
A. smoke tests
B. functional tests
C. acceptance tests
D. non-regression tests
Answer: A
