NEW QUESTION: 3 You work as an Office Manager for Blue Well Inc. The company has a Windows-based network. You want to change values in cells to observe the way in which those changes are affecting the outcome of formulas in the worksheet. Which of the following will you use to accomplish the task? **A.** Form control **B.** Accounting template **C.** Trust Center **D.** What-if analysis **Answer: D** **Explanation:** Explanation/Reference: Explanation: What-if analysis is defined as the process of changing values in cells to observe the way in which those changes are affecting the outcome of formulas in the worksheet. There are three types of what-if analysis tools that are named as scenarios, data tables, and Goal Seek. A user can also install the Solver add-in to accommodate more variables than Goal Seek. Answer option A is incorrect. A form control is an original control that is compatible with old versions of Excel, beginning with Excel version 5.0. It is designed for use on XLM macro sheets. It can be used when a user wants to simply interact with cell data without using VBA code and when he wants to add controls to chart sheets. By using form controls, the user can run macros. He can attach an existing macro to a control, or write or record a new macro. These controls cannot be added to UserForms, used to control events, or modified to run Web scripts on Web pages. Answer option C is incorrect. The accounting template is used for numbering months of a financial year to period numbering. It is used to compare month to month, actual v budget, quarter to quarter, year to year variances. It is the initial point for other reports that need the use of months. Answer option B is incorrect. Trust Center is where a user can find security and privacy settings for Microsoft Office 2010 programs.
