Two-way mirror requires a least two drives.Three-way mirror: This option works similar to the two-way mirror, but it writes three copies of your data on thedrives, which will help you to protect your data from two simultaneous drive failures. Three-way mirror requires, atleast, three drives.Parity: Similar to the standard RAID 5 technology, Parity for a storage space writes your data with parity informationon the available driver to help you protect your data from a single driver failure.
